

Thesis Structure

Abstract (English)

Zusammenfassung (German)

Table of Contents

Table of Tables

Table of Figures

1. Introduction

- 1.1 EDAR Background: Function, Signaling, and Disease
- 1.2 V370A: Discovery, Phenotypic Effects, and Geographical Distribution
- 1.3 Research Gap: (***towards an integrative analysis***)
- 1.4 Research Question, Hypothesis, and Thesis Structure

2. Comparative Genomics: Evolutionary Conservation and Orthology Context

- 2.1 Data and Methods
- 2.2 Cross-species Alignment and Domain Architecture
- 2.3 dN/dS Analysis: Long-term Purifying Selection
- 2.4 Population-level Screening for the Derived Allele in Non-human primates
- 2.5 Synteny: Ortholog Quality Check

3. Population Genetics: Detecting the V370A Sweep

- 3.1 Variant Dataset and Methods
- 3.2 Allele Frequency Distribution of V370A
- 3.3 Selection Scores: FST and iHS
- 3.4 Central Correlation Analysis: $\text{phyloP} \times \text{FST} \times \text{AlphaMissense}$

4. Structural Context: Tolerance and Fold Stability

- 4.1 Data and Methods
- 4.2 Position 370: Localization and Cross-species Structural Conservation
- 4.3 Folding Stability of V370A ($\Delta\Delta G$) Relative to Pathogenic Death Domain Variants

5. Discussion

- 5.1 Summary of Findings
- 5.2 Answer to the Research Question
- 5.3 Broader Implications
- 5.4 Limitations
- 5.5 Outlook

6. Summary and Outlook

7. References

8. Appendix
